

Special Guidance for Covid – 19

Travel and arrival to school

- There are temperature controls at airports and airlines are asking passengers to wear masks so students should be made aware of this
- We will ask students to complete a health declaration prior to arrival. They will need to confirm they don't have symptoms and are fit and healthy to travel
- Staff meeting students will be wearing masks. We will take students' temperature and sanitise their hands before they take the transfer vehicle to school and we will ask all students to wear masks in the vehicle
- Students will be encouraged to change out of their travelling clothes and shower on arrival at the school

Everyday measures in school

- Social distancing in and around the school is important
- One student per desk, less students on dining room tables and making sure students have enough space in bedrooms to have their own space
- In school there is a one way system
- They have wash basins in all rooms and classrooms, and hand dispensers around the school so staff will be reminding students to wash their hands all the time
- Students' trays in the dining rooms are laid for them so they are not picking up cutlery and touching things. Food is served and they are not serving themselves
- All staff not living on the campus wear masks in school. Eg: catering staff and cleaners
- Most teachers and leaders are living on campus with the students
- School is home and we are a big family so they do not need to wear masks around the school campus unless they want to
- We will do daily temperature checks
- Students should respect staff and should listen to and follow what is advised in terms of social distancing. These are important to keep everyone safe

Trips

- When students go out of school and on trips they will wear masks provided by the school when social distancing is not possible.
- We have adjusted the leisure programme to take into account social distancing and students will be in small groups. All trips and activities will happen in Switzerland so we are not travelling across country borders

Other

- Our student insurance policy covers medical even if related to COVID- 9. Obviously cancellation cover is not possible
- Access to local hospital and health centre 5 mins from the school. Emergency rooms are quiet and there is no waiting time to see a doctor
- Testing is available for any students who have the following symptoms: cough, sore throat and high temperature
- If any student shows any symptoms they will be isolated and we will look after them. Please remember children are not a high risk group and normally show few symptoms
